

#38

Across

- 2** Character with bits set to zero
- 5** Decrease magnetism
- 9** Circuits feeding one another
- 10** Magnetic tape coating that uses iron oxide
- 11** Mechanics + electronics + computing
- 14** Program in read-only memory
- 15** Property of an electric circuit by which a voltage is induced in it by a changing magnetic field
- 18** Spring-shaped curve
- 19** Science of light
- 21** Timing crystal

Down

- 1** 30-ton computer; UPENN; 1946
- 3** 1,180,591,620,717,411,303,424 bytes
- 4** Code that detects single- and double-bit errors
- 6** One trillionth of a second
- 7** Unending series
- 8** A variable resistor
- 12** Connects two LANs or two sections of the same LAN
- 13** 2-D pixel array
- 16** ARRL
- 17** A method for detecting objects, especially those under water, with sound waves
- 20** Time of one on/off cycle
